	1200 pupils and over	£99	£165	

training and implementation	Our modules are designed to be straightforward to use and come with full guidance built-in. In addition, we can implement the software at your school or provide training for you or any groups of schools. Full day training courses start from £225 (plus VAT) per person; please contact helpdesk@statlog.co.uk to discuss what you need or to sign up to one of our regular courses. Initial set up costs may apply for some modules.
suggestions, improvements & customisation	Statlog® is fully customizable and our team of software engineers are constantly working to improve and refine the software. If you have a suggestion for feasible improvements that would benefit all, we would normally develop and implement this free of change. If you need something customizing just for you, then we can definitely do this and can quote costs for this before we start - contact helpdesk@statlog.co.uk
fair charging policy	Statlog® costs are kept as low as possible for all users and include full telephone software support and software continuous improvement. Charges are based on a rolling contract with an initial one year term and then six month notice to cancel. Cost will increase by the RPI each year moving forward after the initial term; we will let you know a minimum of six months in advance of any additional price increase (or decreases!).
multi-school discounts	All Catholic Diocese Schools already benefit from an exclusive 10% discount against our standard pricing. More than 250 Catholic Diocese Schools (nationally) purchase the complete Statlog® package to receive a further 5% discount; more than 500 Catholic diocese Schools (nationally) a further 5% discount.

[1] site mangers Statlog® statutory testing module subject to one-off set up charge, with professional set up by either your retained consultant or the Statlog® team

[2] your retained consultant needs to use the Statlog® project manager module for project information to display fully

[3] excludes the cost of physically undertaking the survey which would be subject to additional professional fee either your retained consultant or the Statlog® team
